

renew.

Leading in sustainability

In your honour, a gift supporting lighting up a small village in Timor-Leste has been donated to Renew.

Since 2003, Renew's International Projects Group has installed thousands of solar power systems across Timor-Leste. These systems empower Timor-Leste's poorest rural communities by helping families gain access to electricity at home, often for the first time. With solar-powered light, children can study and parents can be productive after hours.

Your donations are what allow us to continue providing this life-changing work to our international neighbours.

Thank you for your support!
